- Backtest platform development
- System maintenance
- Leading project and determining requirements for development team

PROJECTS

IEXTrading4j

2017-03 — Present

IEX Trading allows to receive market and financial data. Their data can be accessed in real-time during market session, can be downloaded as recorded sessions in PCAP files or can be accessed by bunch of different API-s. Ecosystem of libraries allows to access each type of data from binary packets, REST, SSE or Websocket services.

FIX Parser

2016-03 — Present

Ultimate tool for FIX developers and testers. It allows to upload your custom FIX dictionaries and make your daily work much easier with better field definition, compare FIX messages to find differences in fields values or remember and browse messages parsed in the past.

EDUCATION

*Bachelor of Science in Systems Engineering, **Wrocław University of Science and Technology***

2012-10 — 2016-01

Faculty is teaching how to use the information tools, including writing simple programs, designing data bases and active use of the Internet resources. The studies program involves elements of microeconomy, secrets of managing enterprise finances or the selected issues of market economy. They learn basics in law - especially in the civil law part, economic circulation, competition and consumer protection or intellectual and industrial property protection.

TESTIMONIALS

Patryk Stopyra - Software Developer @ UBS

What is most characteristic for him - it's his engagement. When he obtains a problem to be solved - he focuses on it, gets 100% involved into the subject and does not give up until he comes out with an accurate solution. And he is usually extremely efficient with this.
